

FUNDSXML

WHITEPAPER

The Future of Fund Data Standards

A comprehensive guide to modern data exchange in the financial industry

January 2026

Version 1.0

Introduction

The financial industry is undergoing a significant transformation in how fund data is exchanged and managed. FundsXML provides a modern, standardized framework that addresses the evolving needs of asset managers, distributors and data providers.

This whitepaper explores the key benefits and implementation strategies for adopting FundsXML in your organization.

Key Benefits

- Standardized data exchange across the industry
- Reduced implementation costs and complexity
- Enhanced data quality and consistency

CHAPTER 02

Implementation Guide
